

REVERSE TAP

FILLS FROM THE BOTTOM
IN 7 SECONDS

INNOVATIVE SMART DISPENSER

ReverseTap SMART DISPENSERS

ReverseTap beer dispensers quite literally turn traditional draft beer serving on its head. Whereas a conventional tap requires servers to tilt glasses and dispense ice-cold brews by pouring through the top of the glass, our zero-waste beer dispensers fill cups through and from the bottom in only 7 seconds.

Our ReverseTap patented system minimizes waste and reduces the risk of beverage spills. The control panels are so easy to manage that anyone can use them, including customers making these dispensers perfect for self-serve establishments, fast-casual dining, or virtually any other location serving draft beer.

Your drinks go straight from the dispenser to delight tastebuds, uninterrupted, at record speed.

NO METAL, NO MAGNET, ONLY GREAT TASTE

Premium Beverage Dispensing Kiosks

SUPERIOR CUP TECHNOLOGY

1. HIGH KEG-YIELD

The fill from the bottom up is a revolutionary new way to dispense beer, eliminating keg waste while increasing your revenue.

2. HIGHER PROFITS

This system delivers maximum efficiency, with 99% keg yield and zero waste, so you can maximize profits.

3. HANDS-FREE

A hands-free quick-fill system actually pumps beer from the bottom up to reduce turbulence and excess foam.

4. SPECIALIZED CUPS

Designed with a patented, tension seal cup bottom, with no metal parts or magnets that could affect beverage flavor.

Self-Serve Dispensers

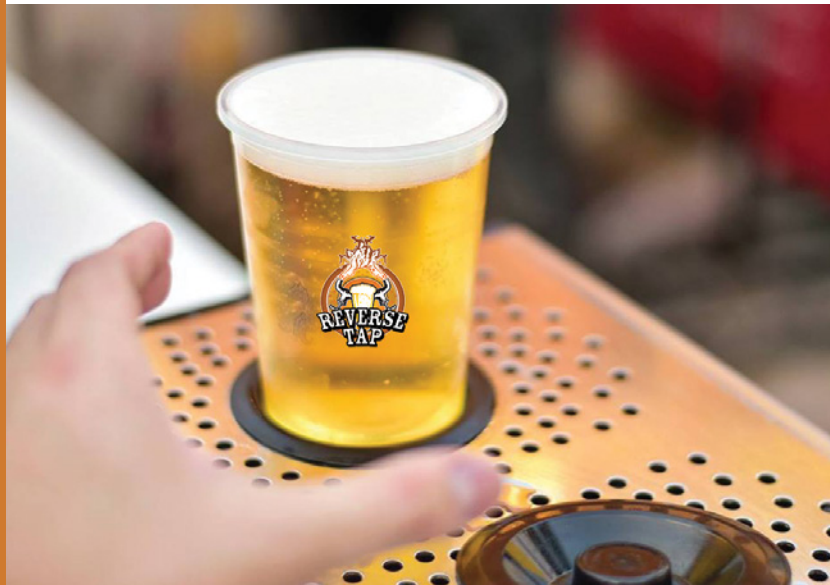

ELEVATE YOUR BUSINESS

In 7 seconds, your customers will have a glassful of your finest beers and a drinking experience like no other. Without a tap to monitor, your staff can spend time doing other essential tasks, and your customers can sample your beverage menu at their pace. With freedom of choice and a superior customer experience, ReverseTap smart dispensers help create an effective and cost-reducing workflow system that benefits everyone.

Touchless Means Safer

CONTACTLESS POURING

Contactless self-serve means customers are in control of their beverage dispensing experience. With no taps to touch, this means safer options for your staff and customers. That's success you can taste.

Serve Up the Best

KEG COCKTAILS

ReverseTap is the only bottom-filling dispenser to serve up the best-tasting cocktails at the push of a button. You can add plenty of ice to the cups, then watch this unrivaled dispenser fill from the bottom without obstructions or clogging—the result is pure, fresh-tasting specialty drinks. (Bartender not required.)

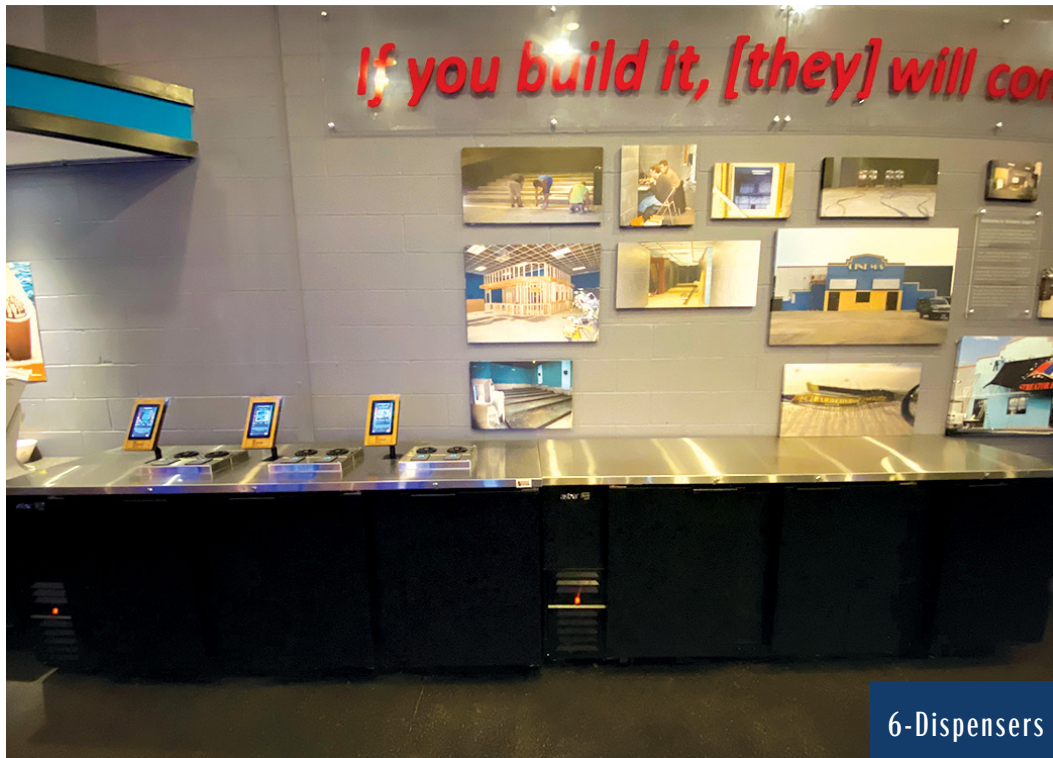

Self-Serve Dispensers

DRINK UP THE PROFITS

Draft beer should be one of your business's best money-makers. The margins on draft beers are significant, but it could be possible that you are leaving hundreds of dollars on the table every single month by using your conventional tap system. Though traditional taps have been the go-to method for dispensing beers for decades, they are far from the most efficient or cost-effective way to dispense beer.

To get the most out of every keg, switch to ReverseTap beverage dispensers and experience the difference. Customers love the fast speed of service, but you will love the considerable reduction in beer waste and labor costs. Now that's a system that calls for a toast.

8-Dispensers

10-Dispensers

Low Profile Dispensers SLEEK AND EFFICIENT

This smart dispenser strikes the sweet spot of function and aesthetics, filling up various-sized cups while preserving the flavor and freshness of your premium drinks. Its sleek appearance adds a sophisticated touch to your establishment, allowing you to secure your elevated beer-serving status.
